THE SCRUM ROLES

SCRUM TEAMS
MUST HAVE AN AGILE MINDSET

- Self-organizing
- Cross-functional
- Delivers products iteratively and incrementally
- Product is created in pieces
- Pieces are planned and delivered in iteration

SCRUM TEAMS ARE MADE UP OF 3 ROLES

THE THREE ROLES WORK TOGETHER DAILY

Product Owner

Developer

Scrum Master

THE PRODUCT OWNER

ALWAYS ONE PERSON, NEVER MULTIPLE PEOPLE

- Owns the What
- Represents the customer
- Decides what and when to release
- maximizes the value of the product increments

- Defines scope for Development Team
- Owns the Product Backlog
- Establishes and promotes the product vision
- Budgets and improves the product ROI

DEVELOPMENT TEAM

COMPOSED OF 3 TO 9 MEMBERS

- Creates the product increments
- Focuses on the work
- Self-organizes on how to deliver their work
- Negotiates the Product Backlog

WORKS IN A RESPECTABLE ENVIRONMENT AND MUST BE ALLOWED TO:

- Estimate their own work
- Produce a "Done" product increment each sprint.
- Own the Sprint Backlog
- Assist the product owner in refining the Product Backlog

## THE SCRUM MASTER

- Upholds the Scrum framework.
- Servant leader
- Allows teams to self-organize and make decisions
- No authority over the Scrum Team
- Works for the team but also have access to the stakeholders
- Responsible for being the Scrum keeper

The Scrum keeper is a
- Teacher
- Facilitator
- Coach
- Change agent

- Impediment remover for the team
- Protects the Development Team
- Facilitates the Scrum Events
